

## Geographic Services

### *Collecting, analysis and presentation of geographic data*

#### Collecting data

- Referencing of scanned plans, maps and airphotos
- Digitalization and vectorization
- Scanning of large-size originals up to DIN A0

#### Data analysis

- Individual consulting for the analysis of GIS-data
- GIS-based reports and studies for environmental pollutant nutrients
- GIS based risk-studies and calculations for ground and surface water bodies
- Making of maps for water-management and landscape architecture
- Analysis of air- and satellite images (landuse cartography)
- Digital image-processing
- Analysis and processing of digital elevation models

#### Data presentation

- Making of complex map layouts
- Processing of digital elevation models for presentation purposes
- Plots up to DIN A0
